L600/700/800

Basic Features

High Rigid Bed & Structure for Heavy Duty Turning Center

01

High Precision, High Rigidity One-Piece Structure

The L600/700/800 series features a 45° slant bed design which is developed through finite element analysis (FEA) to effectively absorb vibration and minimize heat generation. The structure ensures stability which enables powerful and precise cutting.

Box Guideway

For all the axes of L600/700/800 series, box guideways are applied to provide unsurpassed long term rigidity and accuracy, even during heavy duty cutting.

02

Ball Screw

Travel is stabilized by fixing both ends of the ball screw with double anchored method. In particular, a large diameter ball screw with proper preload reinforces sturdiness and resistance to thermal displacement.

03

Mill Turret (BMT)

The BMT turret, with 4 screws solidly fixing the holder, shows outstanding performance in powerful cutting and is capable of machining complex products by using milling tools.

Basic Features

Powerful Cutting Capability & Large Working Area

Travel (X/Z axis)

L600A/MA | 700A/MA | 800A/MA/D : 500/1,680 mm (19.7"/66.1")

L600LA/LMA | 700LA/LMA | 800LA/LMA : 500/3,280 mm (19.7"/129.1")

Main Spindle

The main spindle has become sturdier by enlarging its diameter and thickness. Its sturdiness has been further reinforced by the design combining highly accurate angular ball bearings and roller bearings.

Built-in Tail Stock

The large built-in type tailstock makes it possible to maintain stable machining and accuracy even during a powerful heavy cutting operation. (L800D Series : Option)

High-Precision Spindle

Long Lasting High Accuracy & Excellent Performance
CNC Turning Center

Main Spindle

- To accomplish stability even during heavy duty cutting, the spindle is designed with a combination of P4 level double cylindrical roller bearings and angular bearings.
- The spindle and the headstock are designed to maintain long time high accuracy.
- An advanced double locking device is applied which separates the spindle bearing and pulley. It prevents the release of spindle bearing pretension during heavy duty cutting, chuck cylinder operation, and belt pulley tension.

C-Axis Control

The "M" type machines of L600/700/800 series where milling is possible, provide C-axis control of 0.001°. This enables various types of machining.

Spindle Gear Box

Gear shift of spindle provide stability and high torque during low speed.

L600/700 Series : 3 Step Gear

L800 Series : 2 Step Gear

MT#6 Built-In Tail Stock

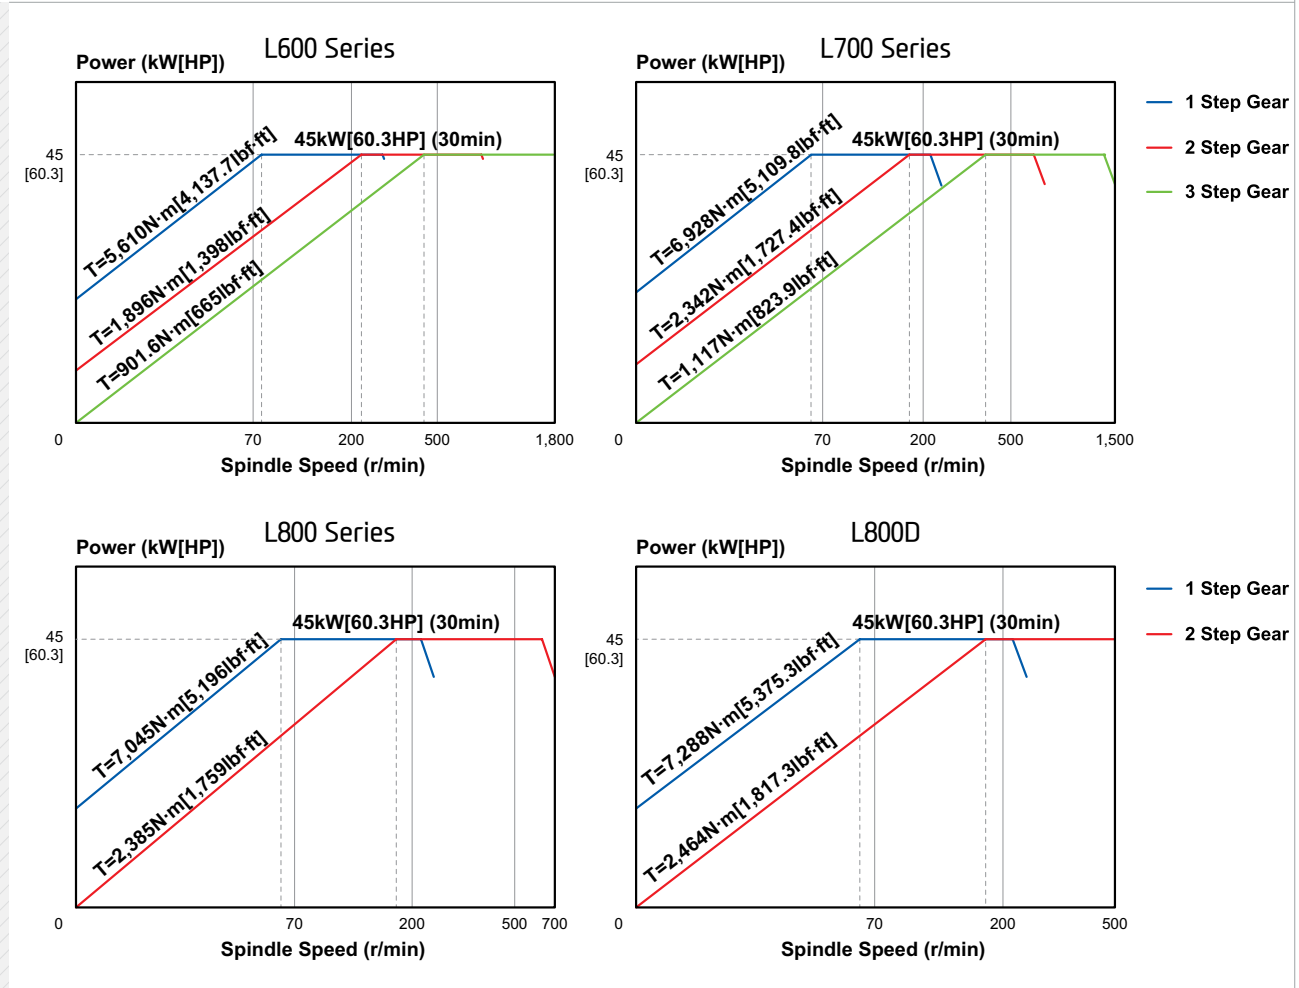

The built-in type tailstock ensures high accuracy even during heavy duty cutting. It can be controlled manually or automatically by program. (L800D Series : Option)

Quill Dia. : $\varnothing 160$ ($\varnothing 6.3$ ") Quill Travel : 132.5 mm (5.2")

Travel : 1,580 mm (62.2"), L Type : 3,180 mm (125.2")

Spindle Output/Torque Diagram

Continuously variable transmission is possible due to the use of a AC conversion motor and the function of controlling the spindle at a certain speed is provided as standard.

Large Machining Area

L600/700/800 Series features the largest machining area in its class, which increases the machine's ability to machine large parts.
